## Objective |

- Improve programming, debugging and problem solving skills.
- Gain strong practical experience in software development and machine learning.
- Lead development teams and manage complex technology projects.
- Become an expert software architect, technology consultant.

## Academic Qualifications |

- Currently pursuing B.Tech third year in Information Technology from Shri Guru Gobind Singhji Institute Of Engineering And Technology , Nanded

| Academic Year | Qualification/Program | Institute                | CGPA/Percentage           |
|---------------|-----------------------|--------------------------|---------------------------|
| 2025 – 2026   | Third Year B.tech     | SGGSIE&T, Nanded         | (till semester 5) 9.43/10 |
| 2024 – 2025   | Second Year B.tech    | SGGSIE&T, Nanded         | 9.39/10                   |
| 2023 – 2024   | First Year B.Tech     | SGGSIE&T, Nanded         | 9.21/10                   |
| 2022 – 2023   | HSC-XII               | MUHS jr. College, Nanded | 76.67%                    |
| 2020 – 2021   | SSC-X                 | IQRA High School, Nanded | 88.20%                    |

## Technical Skills | [Visit](#)

**Programming:** Java, C++, Python, SQL.

**CS Constructs:** OOPs in Java, Data Structures, Computer Networks, Operating Systems.

**Databases/Query Languages:** PostgreSQL, MySQL, MongoDB.

**AI & ML:** NumPy, Pandas, Scikit-learn, Matplotlib.

**Web Development:** HTML, CSS, Node.js, Express.js.

**Tools & Software:** Linux, Git/GitHub, VS Code , Netbeans.

## Key Projects | [Visit](#) for more projects.

### Rainfall Prediction System | Source Code Nov'25

- project implements a machine learning system to predict rainfall probability based on meteorological data. Using a Logistic Regression model, the system analyzes various weather parameters to classify whether rainfall is likely to occur.

### Movie Recommendation System | Source Code March'26

- This project implements a content-based movie recommendation system that suggests similar movies based on a user's favorite movie. The system analyzes movie metadata to find and recommend films with similar characteristics.

## ✂ Achievements | Competitive Programming |

- **Academic Excellence** : Consistently ranked among the **Top students in class**, demonstrating strong dedication, discipline, and the ability to master complex subjects.
- **SQL Micro Course**  : Gained hands-on experience in SQL queries, data extraction, and relational database concepts through practical assignments and real-world tasks.
- **Google Cloud Data Analytics Certificate**  : Earned the Google Cloud Data Analytics Certificate with hands-on experience in SQL, data cleaning, analysis, visualization, business intelligence, and cloud-based data processing/reporting.
- **Python Micro Course**  : Completed the Kaggle Python Micro Course, gaining hands-on experience in Python programming, data handling, functions, loops, and basic problem-solving.
